

CKAN Coin – Proof of Safety

Version 1.0 – June 2025

Introduction

This document serves as a formal **proof of safety, ownership transparency, liquidity lock verification**, and **contract behavior overview** for **CKAN Coin** — a community-owned, decentralized meme token launched on Binance Smart Chain (BSC).

Project Summary

- **Token Name:** CKAN Coin
- **Symbol:** CKAN
- **Network:** Binance Smart Chain (BSC)
- **Contract Address:** [0x58845D14d73D73d1298E0165f8301784E7B9C62D](https://bscscan.com/address/0x58845D14d73D73d1298E0165f8301784E7B9C62D)
- **Website:** <https://warriorckan.com>
- **GitHub Documentation:** <https://github.com/CKANcoin/docs>

Ownership Status

The CKAN Coin smart contract was deployed with no owner from the beginning. Ownership was never assigned, and no wallet has control over the contract. This

design ensures full decentralization and aligns with CKAN's vision of community-first governance.

Later, **ownership was fully renounced**, making the contract immutable and community-controlled.

✓ **No privileged functions:**

- ✗ No minting
- ✗ No blacklisting
- ✗ No transaction fee/tax logic
- ✓ Liquidity management disabled after lock

Ownership renounce was performed after validation of the contract's functionality and community readiness.

🛡️ **Security Measures Summary**

1. **Full renouncement of ownership**
2. **No backdoor or administrative controls**
3. **Contract verified on BscScan**
4. **All source code published:**
[View on GitHub](#)
5. **Token allocation is 100% community-based**
 - No private wallets, no team funds, no hidden mechanisms

🔒 **Liquidity Lock Verification**

Over **607 million CKAN tokens** are locked using Pinksale's PinkLock. All lock records are public and independently verifiable.

- 🔒 Main Lock (50M until 2027-04-22)
- 🔒 30,000 LP tokens (until 2026-05-01)
- 🔒 [Lock Overview Page](#)
